

LESSON 12

Fringes of Syntax: Demonstratives, Numbers, and Conditionals

SECTION 1: REVIEW OF LESSON 11

Quick Summary

In Lesson 11, we examined how Syriac attaches direct object pronouns directly to the verb, creating a highly compressed “fast direct object” (e.g., *qaṭl-eh*, “he killed him” vs. *q̣tal l-ēh*, “he killed to-him”).

5-Question Warm-Up Drill

(Answers in Section 9)

1. How does Syriac buffer the 1st person singular object suffix on a Peal perfect verb?
 2. Translate: *Parq-anī*.
 3. Break down the components of *qaṭlhūn*.
 4. Why does *q̣tal* become *qaṭl-* when adding a suffix?
 5. Translate the double-determined phrase: *ʾAsyeh Alāhā l-malkā*.
-

SECTION 2: DEMONSTRATIVES AND NUMBERS — OVERVIEW

As we wrap up our core tour of Syriac syntax, we encounter the final few connective tissues that hold sentences together: Demonstrative pronouns (this, that, these, those) and Numbers.

Cross-Linguistic Comparison: Demonstratives

Semitic languages feature a close-range pointing word (“this”) and a far-range pointing word (“that”).

- **Hebrew:** זֶה (*zeh* — this, m), הַהוּ (*hahū* ’ — that, m).
- **Arabic:** هَذَا (*hādhā* — this, m), ذَلِكَ (*dhālika* — that, m).
- **Syriac:** ܗܢܐ (*hānā* — this, m), ܗܘܐ (*haw* — that, m).

Syriac Trick: The far demonstrative (“that”) is spelled and pronounced exactly like the 3rd person independent pronoun (*hū* = he/it; *haw* = that). Context dictates the meaning.

1. Pointing Words (Demonstratives)

Demonstratives in Syriac must agree with the noun they modify in gender and number. Unlike English (which puts “this” *before* the noun: “this king”), Syriac prefers to place the demonstrative *after* the noun, or even isolated at the front of a sentence.

- *Malkā hānā* = This king (The king, this one).
- *Malkūttā hādē* = This kingdom.
- *Gabrē hāllēn* = These men.

2. Conditional Clauses (**’en**)

Syriac expresses “If X, then Y” using the particle **’en** (if). The “if” half of the sentence is the *protasis*, and the “then” half is the *apodosis*. Usually, Syriac doesn’t even use a word for “then”; it simply starts the second clause, often with **w-** (and).

- *’En teḥzē, teida* (If you see, [then] you will know).

3. Comparatives (**men**)

Syriac lacks special adjective forms for “bigger,” “faster,” or “better” (like Greek’s -τερος or English’s -er). Instead, it uses the standard adjective and the preposition **men** (from/than).

- *Nūhrā ṭābā hū men ḥešūkā* (Light is good from darkness → Light is **better than** darkness).
- *Rabbā hī men malkūttā* (She is great from the kingdom → She is **greater than** the kingdom).

SECTION 5: THE NUMBERS 1-10

Semitic numbers famously exhibit “gender polarity”—masculine nouns often take what looks like the feminine absolute number ending, and vice versa. However, you only need to recognize them to read them.

NUMBER	MASC FORM (USED WITH FEM NOUNS)	FEM FORM (USED WITH MASC NOUNS)	TRANSLIT
1	אֶחָד (ḥad)	אֶחָדָא (ḥdā)	(One)
2	אַרְבָּע (trēn)	אַרְבָּעָא (tartēn)	(Two)

The Departure

Narrative note: The conclusion of the initial cycle of Mar Yukhannan's acts. The king uses a conditional statement ("If any man...") to establish a new decree. The section closes with a demonstrative and thematic "peace".
